

SRDEV MISSION BROADCAST

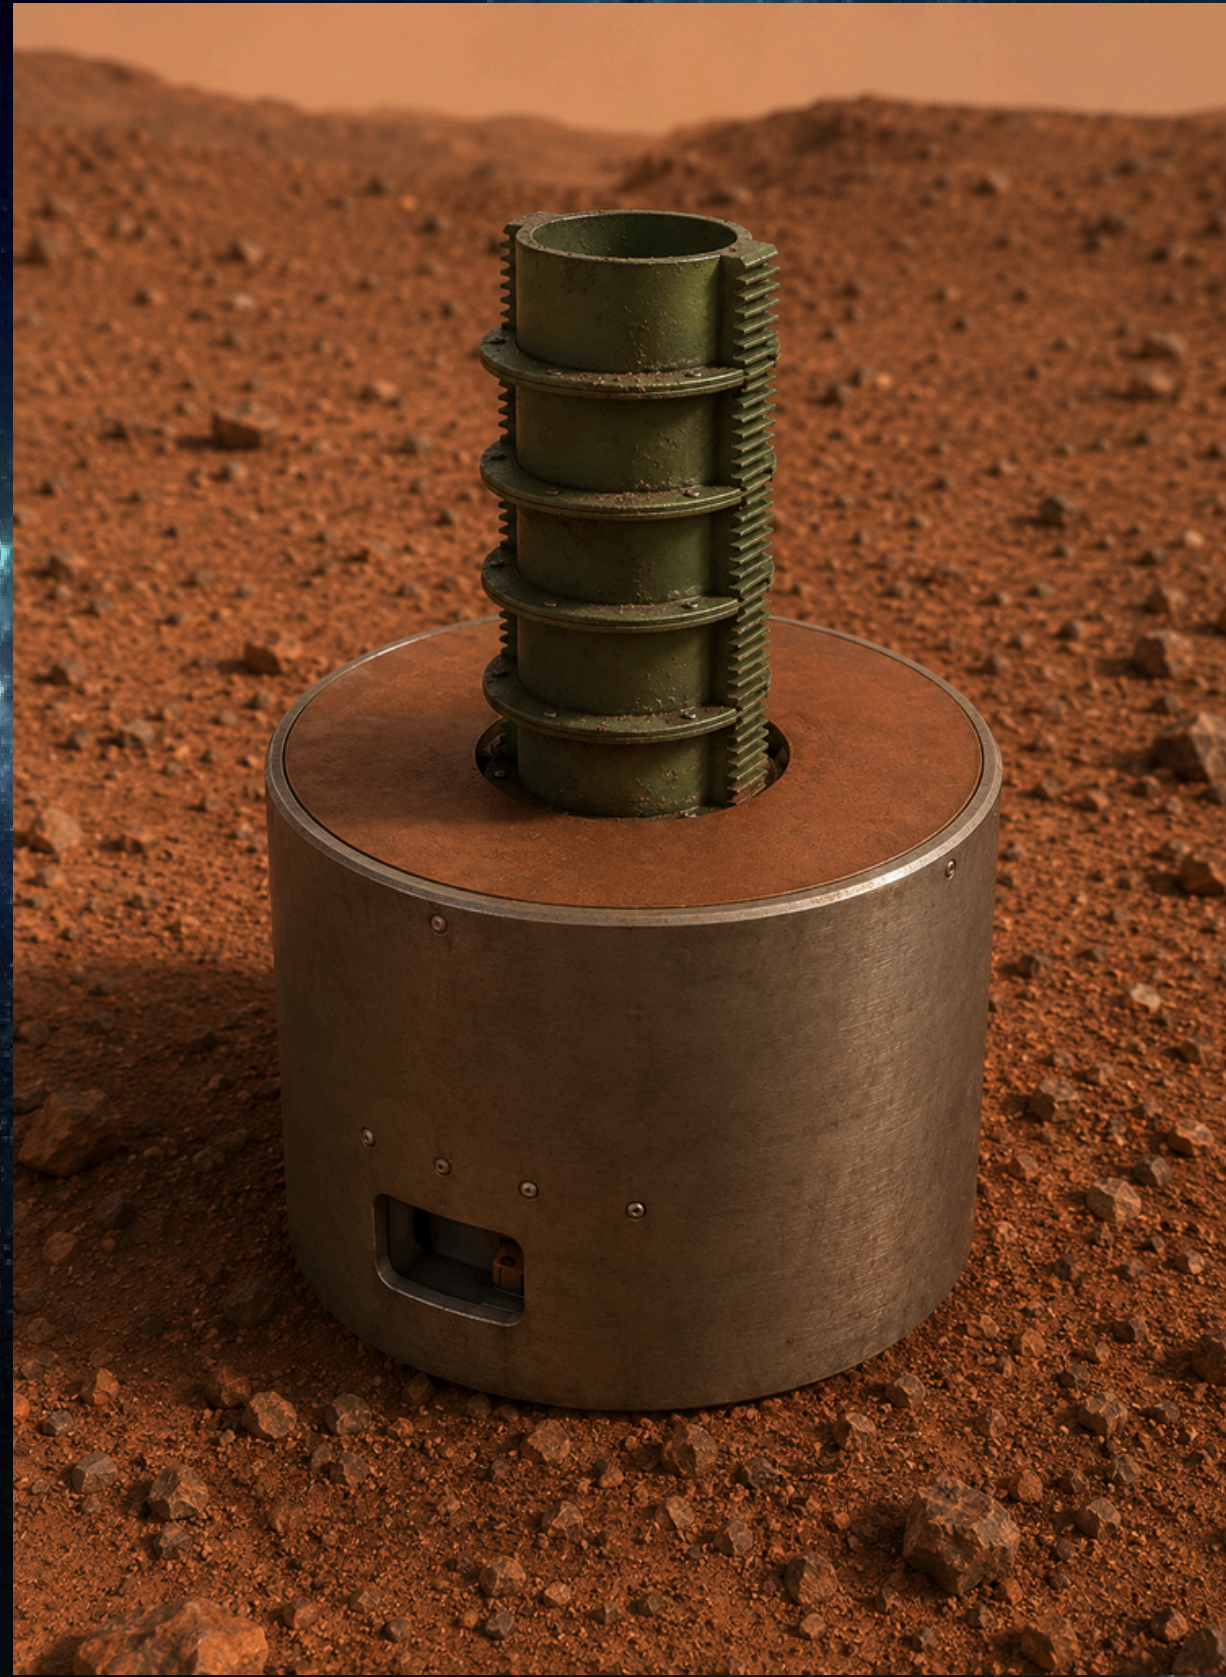

MARS SURFACE | DEUTERONILUS MENSAR

YEAR 2050 | SOL 12,044 | 08:14 LOCAL TIME

LAUNCH: 05-17-2050 11:00:00

EXPECTED TERMINATION: 05-08-2060 22:00:00

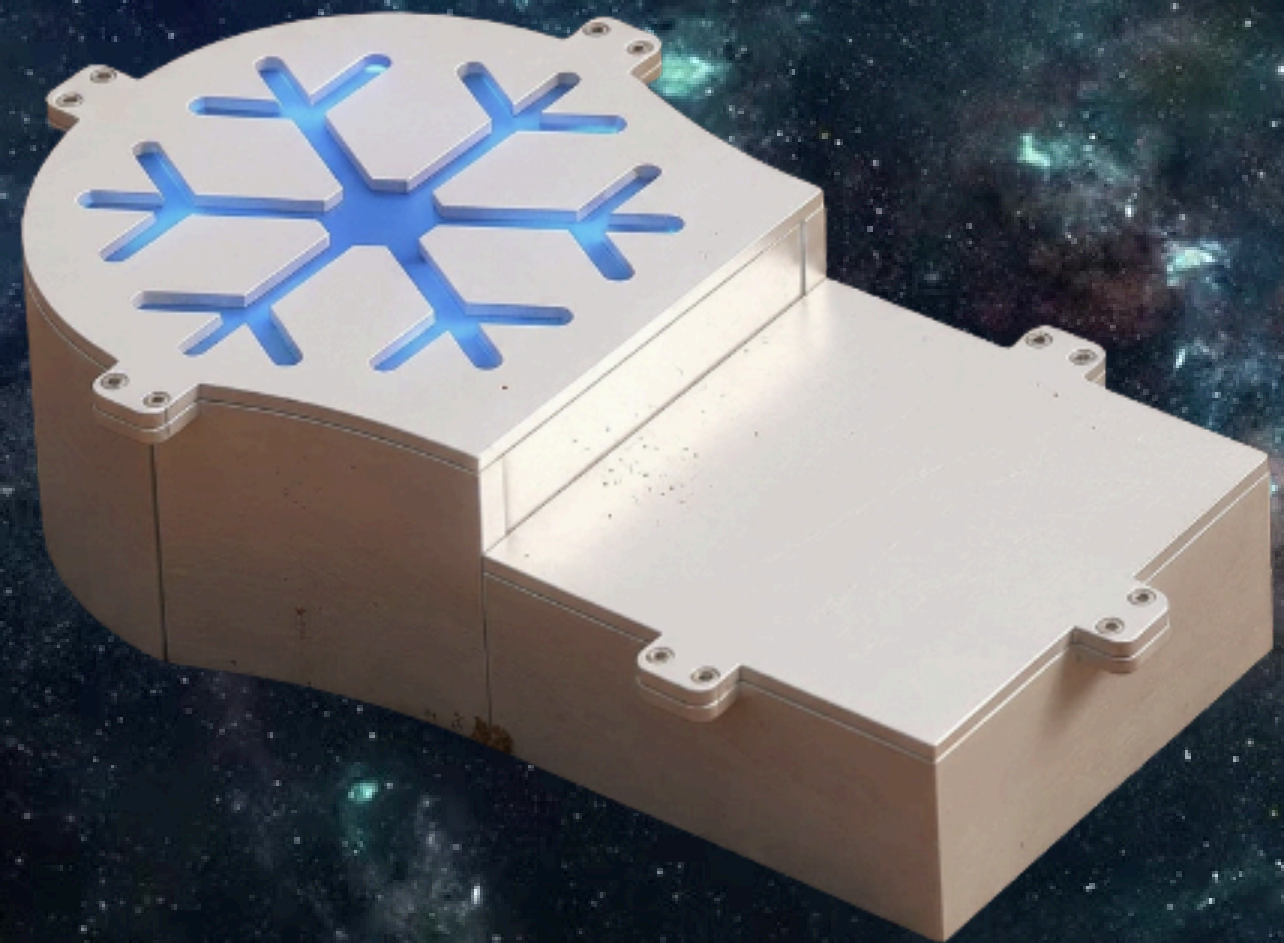

TASK: PLANTS ON MARS

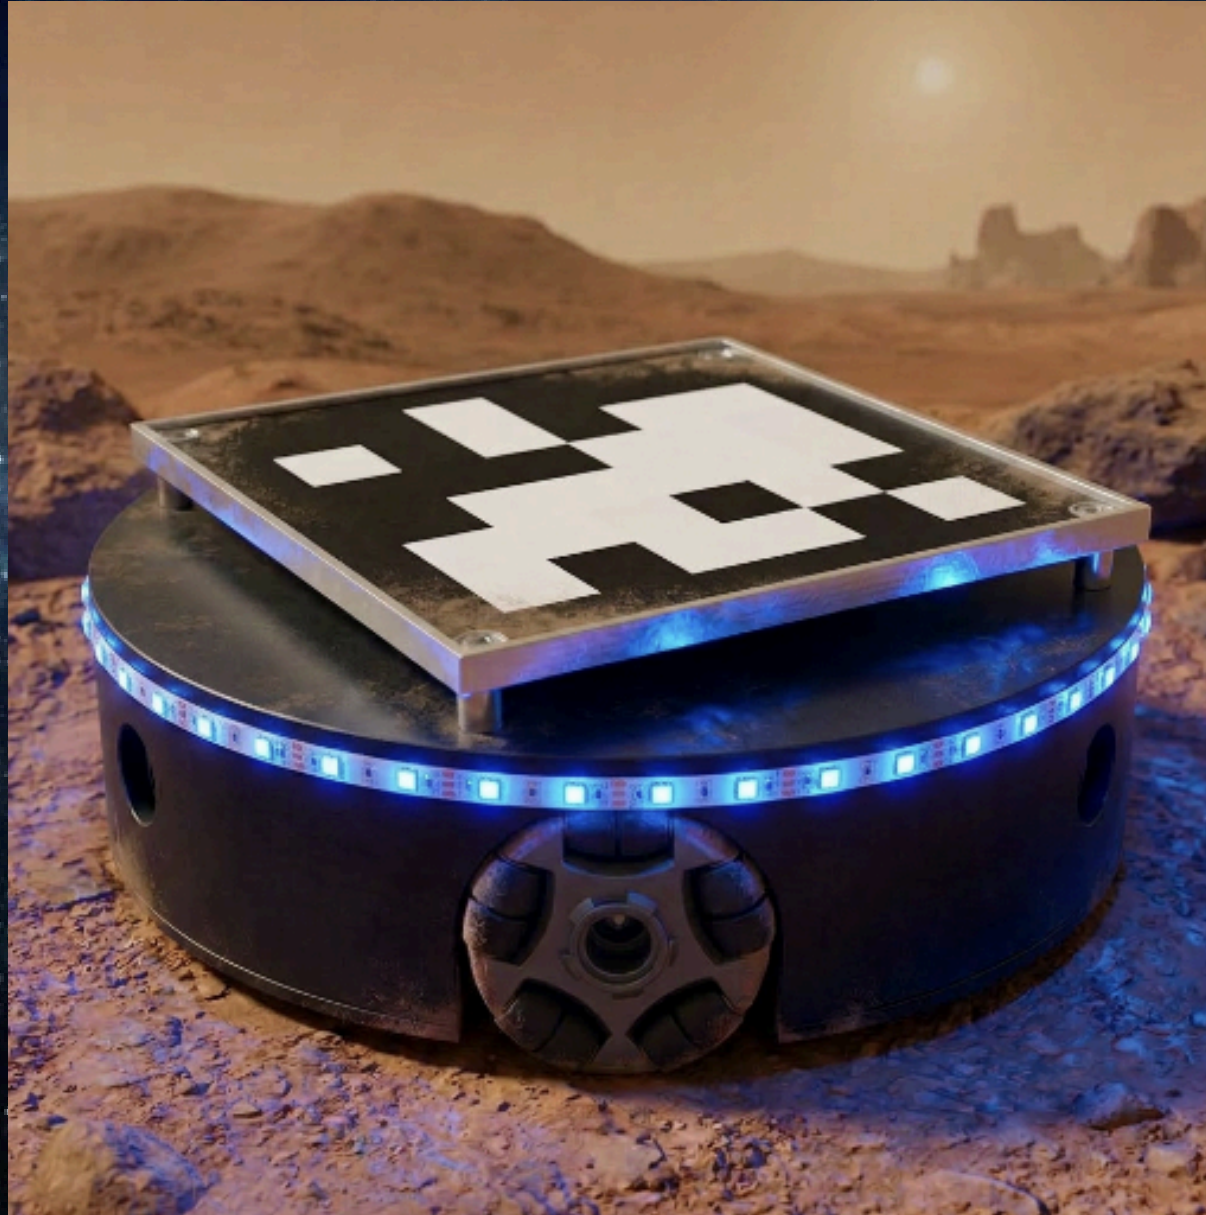

THE MARTIAN GREEN

- Developed in 2046
- Bamboo-like plant that grows in Martian regolith
- Water purification system
- Resistant to dust storms
- High water retention

FROST MARKERS

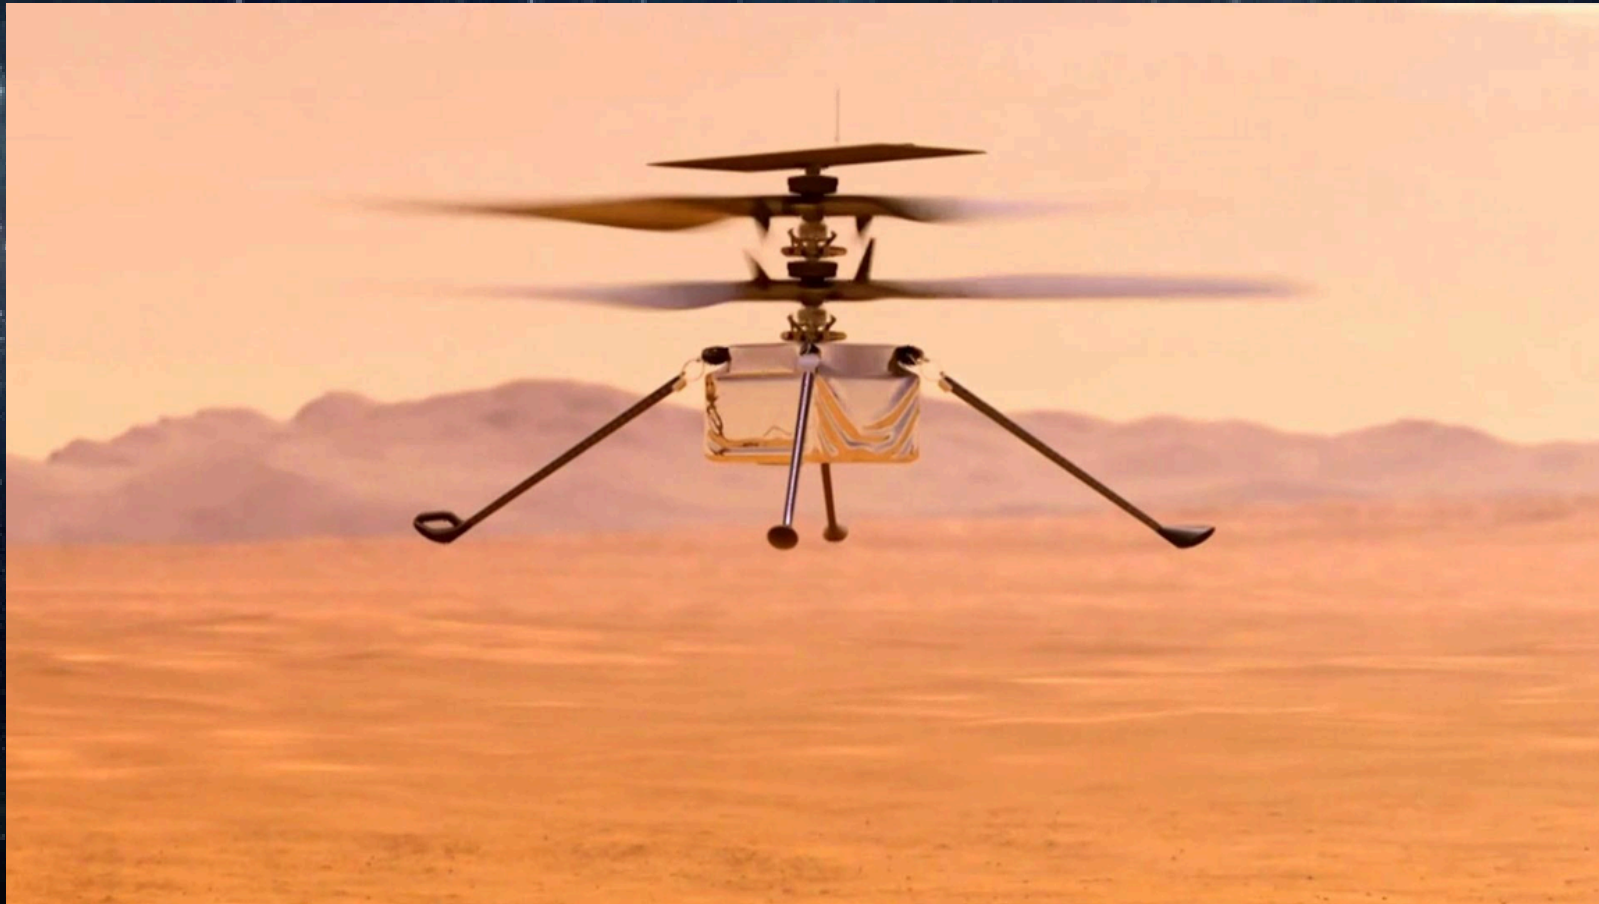

- Indicate area of subsurface ice
- Robots will mine at these locations
- Status light shows amount of material left to extract

RANGERS

- Autonomous, collaborative robots
- Navigates, extracts subsurface ice, and waters plants
- Omnidirectional drive
- April tag marker
- LED water status

SURVEYOR DRONE

- Observes Rangers from overhead
- Provides commands in real-time (as opposed to slow communication with Earth)
- Employs control barrier functions and quadratic programs

THANK YOU FOR YOUR
PATIENCE.

THE MISSION IS ABOUT TO
COMMENCE.
